

# métissages urbains

Artistic creations in the public space in collaboration with citizens who are in marginalized situations or not

## THE CONCEPT

Residences as a pretext to **meet**, an **artistic project** bringing together **citizens who are in marginalized situations or not around the co-creation of an artwork**.

An artistic twinning – mediator of Exeko at the crossroads of **cultural mediation** (having access to the artistic practice) and to **intellectual mediation** (being able to wonder about the purpose of art).

An **accessibility lever to the artistic practice for all**.

## HOW DOES IT WORK?

During about ten workshops **in the street, parks, and/or in the network of our community partners**, participants, under the direction of an artist accompanied by a mediator, co-create a work which, once completed, will be presented **in the public space**.

**The goal** is not the result nor the quality of the work but **the process of creation**, the social mix (being physically together and collaborating in a common work), the encounters and the experience as much in between the artist and the co-creators than for itself.

*Thanks to Exeko, I was able to meet people otherwise hard to reach. I have also received a very generous help, both in accessibility to all, as well as organizational support, travel*

## I WOULD LIKE TO COLLABORATE

I can :

Submit a project (calls are open on our website).

Why ?

Discover other media on practices ;  
Reflect on my practice to make it more inclusive and open ;  
Diversify my approach and my practices in the production of artwork ;  
Explore the community environment.

## I WOULD LIKE TO SUPPORT AND SPONSOR A PROJECT

You would like to host a vernissage? Sponsor an Urban Mix?
